

**Department of Electronics and Communication Engineering  
Indian institute of technology Roorkee**

No. ECE / ECN-300/LBP\_assessment

Dated: 10/04/2023

**NOTICE**

**Attn: IIIrd Yr B.Tech. ( ECE) students**

**Sub:** Lab-based project evaluation (6th Semester)

The lab-based course (ECN-300) will be evaluated through a poster presentation having the following schedule.

**Date: 19<sup>th</sup> April 2023; Time 3:30 PM to 6 PM**

The students are required to prepare a poster as per the following guidelines:

**1. Sections**

- a) Title (with authors and affiliations)
- b) Objectives
- c) Introduction
- d) Methodology
- e) Results
- f) Conclusion
- g) Acknowledgement (if any)
- h) References

**2. Fonts**

- a) size of the poster = A1
- b) Title = 70 pt bold font (Times New Roman)
- c) Section Headings = 30 pt bold font (Times New Roman)
- d) Body Text = 20 pt font (Times New Roman)
- e) Captions = 18 pt font (Times New Roman)

(Font size and font style may vary according to contents but use the same font for titles and headings, and use the same font for text and captions. Text should be justified. Use italics or bold for emphasis. Do not underline or use all caps).

### **3. Color**

Dark text on a light background is easiest to read. Choose a simple color scheme with only two or three related colors. Change colors on graphs and figures so they complement the background color.

### **4. Images**

Use .tif, .jpg or .png image. Images should be ~300 dpi.

### **5. Organization**

Use graphics to convey most information. Keep text to a minimum. Captions must convey much information. Give graphs titles that explain what the viewer should understand from the graph. Keep all elements of a section close to one another, and place captions close to their graphics. Leave space between sections so that the viewer can make sense of the graphics and their corresponding captions.
